Horizon - from a healthy today to a healthier tomorrow

Patient Name	Ganesh Soni	D.O.A.	05/03/2016
Age/Gender	23/M	D.O.D.	
Address		Department	Medicine
Treating Doctors	Dr. B. D. Parmar / Dr. Krunal Gajjar		
Diagnosis	Guillian Barré Syndrome (GBS)		

SUMMARY (CLINICAL):

A 23 yr Male came to Medicine OPD with history of weakness of all the four limbs since 10 days. On history, clinical examination & thorough workup & evaluation, diagnosis of Guillian Barré Syndrome (GBS) was done.

Since plasma pheresis is main part of treatment, the hospital authority & our medical director Dr. Geetika Madan Patel acted promptly & arranged for plasma pheresis on the same day in a very short span of time. Patient was given plasma pheresis on same day & every alternate day for 3 times.

Patient's condition has improved. Initially his power in upper limb was 2/5 which improved to 4/5 and in lower limbs it was 1/5 which improved to 4/5.

This patients improved with plasma pheresis even though it was done after 10 days of disease on set.

There are various such instances in which the prompt action by the hospital authorities & teamwork by our skilled doctors have saved the day of patients.
