## Paediatric Cardiac Surgery - PDA (Patent Ductus Arteriosus) closure

### Department of Paediatric Surgery

A 7 months old girl suffering from major congenital heart disease presented at Department of Paediatric Surgery, Parul Sevashram Hospital. Patient was operated with device closure technology to close the hole in heart instead of long incision over chest wall.

Pediatric Cardiologist & Team performed the procedure successfully in state of the art Cathlab of Parul Sevashram Hospital. The girl was given a new lease of life without any open surgery.
